

PRESS RELEASE

New revolutionary flow regulation and monitoring system ready to be introduced on K-2019 in Düsseldorf.

Mouldpro is excited to introduce a completely new developed line of flow monitoring and regulation units. The product family consist of various solutions to fit any requirement to optimize the production and prevent production loss and failures.

flosense[®] 3.0

Digital flow regulator

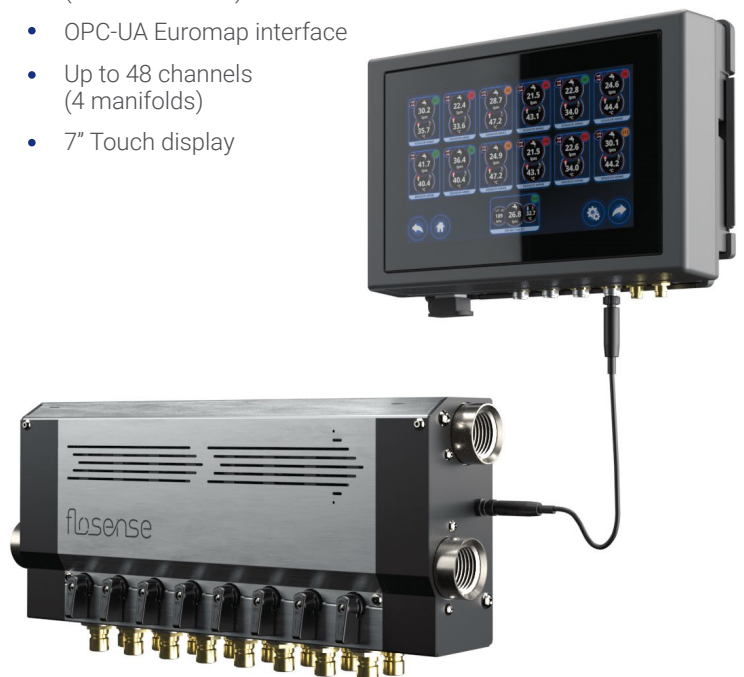

- Replaces traditional flow regulators
- Very affordable pricing
- True plug and play
- Temperature, Flow and Pressure
- Alarm output
- Data storage and export
- Up to 12 channels
- Flow <1-40 l/m
- Pressure up to 10 bar

flosense[®] 4.0

Flow monitor

- Ultra compact design
- Corrosion resistant construction (brass/ss)
- Leak free forged modules
- Integrated dual action adjusting valves
- Working temperature up to 160°C (standard 120°C)
- OPC-UA Euromap interface
- Up to 48 channels (4 manifolds)
- 7" Touch display
