

Mould Technician Complete Tool Carriages

Inside The Carriages

Our high-quality tool carriages feature ball-bearing drawer slides, a central locking system, locking castors, an aerosol holder and Qualicoat coating all as standard. Each drawer of tools comes with custom foam cut inserts making a 'place for everything and everything in its place' to promote a 5S strategy and ease of identifying any misplaced tools.

The Mould Technician Tool Carriage is one of two available variants and combines a selection of high-quality standard hand tools with two drawers of speciality tools for Injection Moulders. This carriage also includes a full range of soft tools for working on moulds without damaging the tool face. The Premium Complete Tool Carriage is the second carriage variant boasting an additional drawer of temperature analysis equipment including standard and infra-red thermometers, plus a thermal imaging camera.

Tool carriages can be completely customised to customer specification.
